Invoices

Create, send, and track invoices for your clients — including one-time and recurring billing on autopilot.

Key Features

- **Invoice Builder:** Add line items using custom entries, products from your catalog, or pre-built packages — each with name, description, quantity, unit, and price
- **Automatic Numbering:** Invoices are numbered sequentially (e.g., INV-2026-0001)
- **Multi-Currency:** Bill in USD, EUR, GBP, CAD, or AUD
- **Discounts & Tax:** Apply fixed or percentage discounts; set a tax rate per line item
- **Payment Methods:** Accept Stripe, bank transfer, check, PayPal, Zelle, cash, or other
- **Public Payment Link:** Share a secure link so clients can view and pay — disable it anytime
- **Payment Recording:** Log partial or full payments with method, reference, and notes
- **Payment Reminders:** Send a quick payment request email from any unpaid invoice without re-sending the full invoice
- **Recurring Invoices:** Auto-generate invoices weekly, bi-weekly, monthly, quarterly, semi-annually, or annually — with optional auto-send directly to your client
- **Renewal Reminders:** Automatically email clients 3, 7, 14, or 30 days before a recurring invoice is due
- **Payment Rules:** Define reusable payment terms to apply consistently across invoices
- **Project & Contract Linking:** Attach invoices to a project or contract for better organization
- **Dashboard Stats:** See total revenue, outstanding balance, overdue count, and paid count at a glance

How to Use

Create an Invoice

1. Click **New Invoice**, select the client account — for example, one of ACME Creative Agency's active clients — and an optional contact
2. Set the title, issue date, and due date
3. Add line items using the **Custom Item**, **Product**, or **Package** buttons
4. Apply a discount and/or tax rate if needed
5. Choose which payment methods to accept

6. Optionally link to a project or contract and fill in billing info
7. Add internal notes or client-facing terms, then click **Save Invoice**

Send an Invoice

1. Open the invoice and click **Send** to email it to the client
2. Or click **Mark as Sent** if you sent it another way
3. Share the public link — the invoice moves to **Viewed** once the client opens it

Record a Payment

1. Open the invoice and click **Record Payment**
2. Enter the amount, date, method, and an optional reference or note
3. Save — the status updates automatically (Partially Paid → Paid)

Set Up Recurring Billing

1. Open any invoice and click **Make Recurring**
2. Name the schedule, choose the frequency, and set a start date
3. Enable **Auto-Send** to email each generated invoice to the client automatically
4. Optionally set a renewal reminder (3, 7, 14, or 30 days before each invoice)
5. Save — new invoices generate on schedule without any manual work

Manage Schedules

- Pause, resume, or cancel a recurring schedule at any time from the row menu
- Click **View Schedule** on any recurring invoice to see its frequency, next date, auto-send status, and how many invoices have been generated

Invoice Statuses

- Use **Copy Link** from the list to grab the public payment link without opening the invoice
- Use **Send Selected** to email multiple invoices to clients in one action
- Filter by **Year** or **Status** to quickly find what you need
- Delete draft and cancelled invoices in bulk using the checkbox selection
- Use **Mark as Sent** in bulk to update multiple invoices at once
- Click **Payment Rules** in the page header to manage reusable billing terms
- The **Outstanding** stat includes all sent, viewed, and partially paid invoices
